WHERE [cc_permit_type] = 'R' AND [cc_permit_date] >= #1/1/85#;

Overview

The emGovPower Permits and Code Compliance module supports the operations of the Buildings department in the management of construction within its jurisdiction. Entry of permit requests, management of sub-contractor permits, pricing, inspections, monitoring of inspection failures and printing of CO's support the Building department staff.

Differentiating Functionality

- Supports the entire process
- Extensive history supports management analysis of growth
- Flexible computation algorithms
- Interfaced to Accounting
- Interfaced to Cashiering to support payment processing
- Supports applications and permit reviews
- Captures sub-contractor information
- Supports inspections and captures results
- Prints pertinent documents

Business Benefits

- Accurate records for accounting and business management
- Assures that all steps are taken at the proper time
- Permits monitoring of unfinished permits and contractors
- Captures contractor information and licenses to assure proper experience
- Will have imaging capability to gather paper documents without having to retype data
